About Me:

Passionate and dedicated Full Stack Web Developer with approximately three years of experience creating innovative and efficient web solutions. My expertise primarily lies in frontend development using modern frameworks like React and Next.js, as well as content management systems including WordPress and Shopify. Since relocating to Calgary in 2013, I have immersed myself in the local tech community, contributing to and learning from a vibrant network of professionals. Through my recent freelance work, I have expanded my skillset to include Python backend scripting and API development using FastAPI. I thrive on tackling challenging problems and leveraging my comprehensive knowledge of both front-end and back-end technologies to deliver robust, scalable applications. My commitment to continuous learning and active participation in tech meetups and forums keeps me at the forefront of industry trends and best practices. As a permanent resident of Canada, I am excited to continue honing my skills and making meaningful contributions to a dynamic team.

Skills

Front-End
